MEMORANDUM

TO: Joint Committee on Plastics

FROM: Robert W. Powitz, Chairperson of the Joint Committee

DATE: April 30, 2008

SUBJECT: Proposed revision to NSF/ANSI 24 (24i6r2)

Enclosed is the ballot for Draft 1 of NSF/ANSI 24 issue 6, revision 2. Please review the proposal and return your ballot by the ballot due date of May 21, 2008 via the NSF online workspace.

Purpose

To update section 10.1.3 to include body waste and liquid waste inlet sizes consistent with NFPA 1192.

Background

Section 10.1.3 of Standard 24 states that inlet connections shall be nominal 3-inch diameter minimum pipe size. The standard should differentiate between gray waste and black waste, allowing 1-½ inch diameter inlets on gray waste tanks, and 3-inch diameter on black waste tanks.

This change was proposed to the JC at the 2007 meeting. Comments were received on revision 1. Revision 2 includes clarity to the pipe sizing and the definitions of liquid waste and body waste.

Public Health Impact

None of the above issues has a public health impact.
