Plumbing system components for recreational vehicles

10.1.3 Body waste tank inlet connections shall be vertical and shall have an internal nominal 3.0 in (76.2 mm) NPS or as recommended by the manufacturer of the toilet. The inlet may be integrated with a standard closet flange. Liquid waste tank inlet connections shall be vertical and shall have an internal 1 1/2 in (38.1 mm) NPS.

Reason:
10.1.3 The word “internal” was added for clarification.
