Class I and III conference call agenda – 01/17/08

Introduction and reading of antitrust statement

Class I Cabinets

Definition of a class I cabinet from Standard 49:
A ventilated cabinet for personnel and environmental protection, having an un-recirculated inward airflow away from the operator that exhausts all air to the atmosphere after filtration through a HEPA filter. Class I cabinets are suitable for work where no product protection is required.

- Discussion of the definition and any need to refine or expand it
- Materials, design and construction requirements
- Scope of testing

Class III Cabinets

Definition of a class III cabinet from Standard 49:
A totally enclosed, ventilated cabinet of leak-tight construction. Operation in the cabinet are conducted through attached rubber gloves. The cabinet is maintained under negative air pressure of at least 0.50 in. w. g. (120 Pa). Downflow air is drawn into the cabinet through HEPA filters. The exhaust air is treated by double HEPA filtration or by HEPA filtration and incineration.
