MEMORANDUM

TO: Joint Committee on Plastics

FROM: Robert W. Powitz, Chairperson of the Joint Committee

DATE: January 18, 2008

SUBJECT: Proposed revision to NSF/ANSI 24 (24i4r1)

Enclosed is the ballot for Draft 1 of NSF/ANSI 24 issue 4, revision 1. Please review the proposal and return your ballot by the ballot due date of February 7, 2008 via the e-balloting system.

Purpose

To add requirements for mechanical seal toilets and tanks to meet the appropriate sections of IAPMO TS-1.

Background

The current requirement in sections 11 and 12 have load tests that are not specifically designed for toilets in recreational vehicles. Therefore, this change has been proposed in conjunction with the removal of the requirement to meet ANSI Z124.4 sections on “Structural Strength and Integrity” and “Wear and Cleanability.” The load test as described by TS-1 would be required in replacement of the previously required tests, which are recommended for removal in 24i2r1. IAPMO TS-1 is a standard for RVs that is nearly identical to the CSA requirements, which is more appropriate for this product type.

This change was proposed to the JC at the 2007 meeting and was motioned to ballot.

Public Health Impact

None of the above issues have a public health impact.
