NOTE: An issue document may be submitted at any time – it comprises two parts: the cover sheet (this page) and a description of the issue to be submitted to the Joint Committee (following page). A separate issue form is required for each issue submitted. Issue papers include proposals for modification of a standard, information reports and (of current research, etc.). An issue paper shall be categorized as being for ACTION or for INFORMATION. Submitters should limit the Issue Paper to 1 or 2 pages – attachments detailing full recommendations or background information may be attached with supplementary information. The Chairperson of the appropriate Joint Committee will respond within 30 days of receipt of the issue document advising what steps will be taken. Any issue document intended for discussion at a Joint Committee meeting must be received at least 21 days prior to the meeting to ensure inclusion in the agenda.

Action _____ X _______ Information _______________________

NSF Standard(s) Impacted:
Standard 24

Issue Statement:
Provide a concise statement of the issue, which reference as appropriate any specific section(s) of the standard(s) that are related to the issue.

Section 10.1.3 of Standard 24 states that inlet connection shall be nominal 3-inch diameter minimum pipe size. The standard should differentiate between gray waste and black waste, allowing 1-½ inch diameter inlets on gray waste tanks, and 3-inch diameter on black waste tanks.

Background:
Provide a brief background statement indicating the cause and nature of concern, the impacts identified relevant to public health, public understanding, etc, and any other reason why the issue should be considered by the Committee.

The NFPA 1192 Standard on Recreational vehicles allow for a 3 in diameter on body waste holding tanks, and a 1 ½ in diameter on liquid waste holding tanks.

Recommendation:
If action by the Joint Committee is being requested, clearly state what action is needed: e.g., recommended changes to the standard(s) including the current text of the relevant section(s) indicating deletions by use of strike-out and additions by highlighting or underlining; e.g., reference of the issue to a Task Force for detailed consideration; etc. If recommended text changes are more than a half page, please attach a separate document.

10.1.3 Body Waste Tank inlet connections shall be vertical and shall be nominal 3 inch (76.2 mm) diameter minimum pipe size. The inlet may be integrated with a standard closet flange. Liquid Waste Tank inlet connections shall be vertical and shall be nominal 1.5-inch (38.1 mm) diameter minimum pipe size.

Supplementary Materials (photographs, diagrams, reports, etc.): If not provided electronically, the submitter will be responsible to have sufficient copies to distribute to committee members.
