Joint Committee on Wastewater Technology 2019 Annual Meeting
Draft Meeting Summary Excerpt
Wednesday, September 18, 2018 – Thursday, September 19, 2019
NSF International, Ann Arbor, MI

This document is part of the NSF International Standards process and is for NSF Committee uses only. It shall not be reproduced, or circulated, or quoted, in whole or in part, outside of NSF activities, except with the approval of NSF.

**WWT 2019-14 – wash load stress**
S. Williams presented an issue paper regarding potential revisions to standard 350. The language in the vacation stress section has some inconsistencies regarding wash loads and residential systems, and the paper looks to harmonize them.

**Motion by S. Steiner:** Send to Joint Committee approval ballot.

**Second:** A. Rubin

**Discussion:**
E. Roeder sought clarification on whether the stress load data was reported. S. Williams noted that the intent was to ensure that wash loads are not part of stress of a commercial system.

**Vote:**
- 17 affirmative
- 1 opposed (K. Sherman)
- 4 abstain (S. Berkowitz, G. Heufelder, D. Morin, R. Suchecki)

**Motion:** Carries.
