Task Group on Pool Chemical Evaluation  
Teleconference Meeting Summary DRAFT  
January 28, 2020

This document is the property of NSF International (NSF) and is for NSF Committee purpose only. Unless given prior approval from NSF, it shall not be reproduced, circulated, or quoted, in whole or in part, outside of NSF.

**Participating members:**
- Consultant - Public Health/Regulatory: Campbell, Suzie
- NSF International: Randall, Scott
- Tollyrat Enterprises, LLC: Costanzo, Mary
- Consultant: Pickens, Ph.D., Stanley

**Participating observers:**
- UL LLC: Dail, Amanda
- NSF International: Snider, Jason
- NSF International: Stark, Blake

**Discussion**
S. Randall welcomed everyone and called the meeting to order. J. Snider took roll and read the anti-trust statement. Four of the 19 voting members were present (21%) which did not represent a quorum.

S. Randall began with an update on RWF-2019-6 – Conformity assessment, which had been assigned to the group at the 2019 JC meeting. B. Stark had begun work on a draft for the TG to review but hoped to have the draft ready for the group’s next teleconference.

The next agenda item was RWF-2019-5 – Annex R. During the group’s last teleconference, participants were asked to provide input and supporting documentation on the possibility of increasing the 10ppb threshold of evaluation level. To date, no input has been received. S. Randall asked for input from the group again.

S. Randall moved on to RWF-2019-8 – Chemical Scope. He explained that the intent of the issue paper was to define the scope of swimming pool treatment chemicals to exclude chemicals that are used in the pool arena but not used to treat the pool water – for example, pool deck cleaners. He noted that the group had modified the language during the last call by adding examples.

**Motion by S. Campbell:** Send the modified language to TG straw ballot  
**Second:** M. Constanzo  
**Discussion:** None  
**Vote:** All in favor  
**Motion:** Carries

The last agenda item was RWF-2019-7 – Chemical Reorganization. S. Randall reminded the group that he submitted the issue paper to consolidate the chemical information in the standard into one section to improve clarity. At the JC meeting in September, it was moved to send the work to this Task Group. S. Randall informed the group that he had created a draft document of the new section, which would consolidate section 3 and annex R into one new section. He noted that the intent was not to add or remove requirements, but only move the language together and consolidate duplicative language. The group agreed to conduct a high-level review of the language during this call, with the hope that the group would be ready to make a determination during the next Task Group call. The group discussed the swim models, which S. Campbell suggested needed updating. S. Randall asked S. Campbell to submit an issue paper, as that would be a separate charge for the task group. After some discussion about the models, S. Randall suggested the group focus on the current charge of organizing the language, and then look into changing the language when an issue paper is submitted. A. Dail noted that the titles of sections 25.3.2 and 25.4.1 were similar and suggested a change to 25.3.2, which S. Randall agreed to.

**Action items**
- Opinions on increasing threshold of evaluation per RWF-2019-5 – Annex R can be submitted to jsnider@nsf.org for discussion.  
- J. Snider to prep straw ballot based on discussion of RWF-2019-8 – Chemical Scope.  
- Task Group to review Draft document of chemical reorganization in preparation for next TG call.  
- Next teleconference date April 14, 2020.
