49i130 – Work Area Definition
S.Williams is the Issue proponent, and recapped the background as well as the straw ballot details from earlier in 2019. Reminded the group about the Smoke test work he completed and discovered it wasn’t obvious where the ‘work area’ was. This ultimately leads to a misapplication being applied the same way throughout the standard. S.Williams confirmed this went to ballot and was shot down with lots of comments, adding the next step would be to use the comments and rewrite the next revision. Said this might not be easy or resolved soon, but those are the next steps.

B.Powitz asked if there were any other questions; none were brought to the floor.

Prior to breaking for lunch, there was a brief show and tell from C.Binder regarding the use of the DIM.
