WWT-2020-11 – Missing Section

B. Hennig explained that the issue paper was submitted because a section that had previously been in the standard was missing in this publication. J. Snider confirmed that the language appeared to have been incorrectly removed in the 2015 publication. Though the language had not been balloted to be removed from the standard, since the language had been missing for a number of years, it was being balloted back into the standard.

Motion by G. Heufelder
