Tab 7 – Standard 25 (report included in the 2017 meeting packet)
D. Negandhi is the TG chair, confirming the group met three times since the previous JC face to face, and explained the one open issue facing the TG, specifically to synchronize the NAMA vending machine standards with NSF 25 so NAMA standards can be retired.

M. Perez opened the floor for comments and there was none, so he simply confirmed that the currently the TG was working on each section separately and would decide at a later date whether the JCFE ballots would be by section, or if all sections would be combined into one large ballot.
