I. **New Business**

**WWT-2020-18 – 350 scope**

J. Brown presented the issue paper, which was submitted the day before the meeting. The paper noted that NSF/ANSI 350 is referenced in the Uniform Plumbing Code. Currently, the scope of Standard 350 references treatment on combined systems and laundry. The proposed revisions do not intend to change the scope, but rather clarify the list of systems that fall under the scope of NSF/ANSI 350.

- **Motion by S. Steiner**: Send issue paper WWT-2020-18 to Joint Committee straw ballot
- **Second**: J. Bell
- **Discussion**: None.
- **Vote**: All in favor
- **Motion**: Carries
