

Joint Committee on Wastewater Technologies

November 20, 2024

Proposed revision to NSF/ANSI 350 – Onsite Residential and Commercial Water Reuse Treatment Systems (350i84r1)

Revision 1 of NSF/ANSI 350, issue 84 is being forwarded to the Joint Committee for consideration. Please review the proposal and **submit your ballot by December 11, 2024** via the [NSF Online Workspace](#).

Please review all ballot materials. When adding comments, please include the section number applicable to your comment and add all comments under one comment number whenever possible. If you need additional space, please use the attached blank comment template in the reference documents and upload online via the browse function.

Purpose

The proposed revision will remove the duplicate normative references table in Section 2.1.

Background

Last year, NSF standards started being published with a new abbreviations table included in the foreword of the document. As this is in the foreword and not the body of the standard, these abbreviations can be added or removed as the standard is modified.

The abbreviations table in Section 2.1 contains duplicate abbreviations of those already in the foreword. The removal of this section will not change the section numbers of any other sections, as it is listed after the normative references in Section 2.

If you have any questions about the technical content of the ballot, you may contact me in care of:

A handwritten signature in black ink, appearing to read "R. Powitz", with a stylized, cursive script.

Robert Powitz, Chair, Joint Committee on Wastewater Technology
c/o Shannon McCormick, Joint Committee Secretariat
