

NSF is seeking experts to serve on various committees

Readers, please forward this request to your expert contact who would be interested in serving in this capacity. Please contact standards@nsf.org for further details or to request an application.

Members provide technical guidance, review and vote on revisions to NSF/ANSI standards, and address public health and safety issues. Members are needed to represent the three key stakeholder groups of **Industry**, **Public Health / Regulatory**, and **User**, which are defined below.

- **Industry:** A person who produces, assembles, distributes, or sells materials, products, systems, or services covered in the scope of the standard. Industry trade association representatives are included in this membership classification.
- **Public Health / Regulatory:** A person from a public agency (local, regional, state, federal, or international) or represents a professional public / environmental health / safety organization, academia, or a model code organization.
- **User:** A person outside the manufacturing sector who purchases, uses, or specifies materials, products, systems, or services covered in the various scopes of the NSF/ANSI standards.

Additionally, some Joint Committees may have other stakeholder groups if deemed necessary, which are defined below:

- **Academic / NGO:** A person who is from a university, college, or nongovernmental organization.
- **Distributor:** A person who represents the supply chain of the product following manufacture.
- **Ingredient Supplier:** A person who represents the supply chain of a product through manufacture.
- **Fabricator / Formulator:** A person who represents other businesses commercially engaged with a finished product(s), by specifically formulating ingredients or compounds of ingredients as components for the finished product(s).
- **Other Industry:** A person who represents other businesses commercially engaged with a product, e.g., suppliers and their trade organizations, recyclers and their trade associations, retailers and their trade associations, and other types of businesses commercially engaged.
- **Product Certifier / Testing Lab:** A person whose company provides certification or whose facility provides controlled conditions in which testing may be performed.
- **Trade Association:** A person who represents a collection of companies and/or individuals working in the same industry or user group with similar interests in outcome.
- **Water Utility:** A person who represents a municipality or private corporation or association that furnishes water to the public for household and drinking purposes.

There are currently openings on the following committees.
Interest categories with an immediate need are indicated in *red.
