	<hr/> Previous Progress Update <ul style="list-style-type: none">• Since the previous meeting, the TG chair has spent considerable energy revising the current working draft.• This draft was sent to this TG for feedback Support documents <ul style="list-style-type: none">• NSF/ANSI 174 - Mobile Food Units

- [NSF 174-20XX - DRAFT NEW - ALL COMMENTS](#)

Action

Discuss comments regarding current draft and determine next steps

Previous Progress Update

- During the previous meeting the group discussed the draft definition for mobile food units which was crafted by the Ad Hoc Group. With some additional modifications the group motioned the language to straw ballot with this TG.
- That straw ballot yielded a vote of **12 : 0 : 0 (Yes : No : Abstain) with 0 comments.**

Action

With this working definition in hand, the TG chair suggests the follow action for today's meeting:

1. Review/discuss document submitted by Doug Farquar after last call.
2. Continue scope refinement discussion from last call.
3. Begin discussing considerations for the structure of the standard body. What to include/exclude vs reference from other standards. Some of this may also have an impact on the scope.

Progress Update (May 14, 2024)

- During the previous meeting the group decided to establish an ad hoc group to draft a definition for "Mobile Food Unit".
- This small group made up of the 3 categories of members met and did just that. The current draft language and thoughts will be presented at this full TG meeting today.

Action

Discuss proposals and next steps

Previous Progress Update (December 19, 2023)

- During the previous meeting the group decided to first focus on Scope, Title, and Purpose of the Standard before continuing efforts on the content.
- These sections were recently open for review and comment via straw ballot which yielded a vote of **9 : 0 : 0 (Yes : No : Abstain)** with **4 comments**.

Previous Progress Update (July 18, 2023)

- Approximately 20 years ago NSF began the development of a new Food Equipment Standard called: **NSF/ANSI 174 Mobile Food Units**, to be in accordance with ANSI (American National Standards Institute) approved procedures.
- The intent was to create a standard to set minimum public health and sanitation requirements for the design and construction of mobile food units. Mobile food units would include trailers and motorized vehicles that may prepare and/or serve food to a wide array of consumers.
- From 2002 to 2006 the Task Group assigned this created and began balloting language.
- Although a generally robust Standard was largely created, the process was not completed due to other urgent unrelated public health issues affecting other Food Equipment Standards such that the group focused energies elsewhere.
- During the 2022 Face-to-Face meeting the group agreed to resurrect work on this project
