

ISSUE PAPER

NSF standard(s) impacted: NSF/ANSI/CAN 14-2023, Tables 9.13 and 9.14

Purpose and background:

CSA B182.2 PSM Type Polyvinylchloride (PVC) Sewer Pipe and Fittings (PSM Type) is a reference standard within NSF/ANSI/CAN 14-2023. There are currently no quality assurance requirements for products certified to this standard in NSF/ANSI/CAN 14-2023. This issue paper adds these quality assurance requirements to the appropriate tables, Table 9.13 for pipe and Table 9.14 for fittings.

Item #: PLAS-2024-15
(For NSF internal use)

Recommendation:

Table 9.13

(For NSF internal use)

^a Test does not apply to CSA B137.3 products.

^b If one material is continuously used in several machines or sizes, then when a steady-state operation is obtained on each machine, sample selection shall be from a different extruder each day and rotated in sequence among all machines or sizes.

^c Test only applies to CSA B137.3 products.

^d Impact testing shall be in accordance with ASTM F480 as referenced in Section 2 of this standard and the specified impact classification of IC-1, IC-2, or IC-3.

^e 23 °C (73 °F) impact applies only to products produced under ASTM D2241 as referenced in Section 2 of this standard.

unrestrained hydrostatic test	—	start-up ^e	—	—	—	—
product standard(s)	ASTM D2464, ASTM D2466, ASTM D2467, CSA B137.3	ASME A112.4.4 ASTM D2665, ASTM D2949, CSA B181.2	ASTM D2729, ASTM D3034, ASTM F679	ASTM F480	ASTM F1336 CSA B182.2	ASTM D2672, ASTM D3139, ASTM D3212

^a Acetone applies only to products produced under ASTM D2729 as reference in Section 2 of this standard.

^b Burst pressure requirement does not apply to reducer bushings.

^c Test does not apply to CSA B137.3 products.

^d Toilet flanges listed to ASTM D2665, D2949, CSA B181.2, and ASME A112.4.4 are exempt from the QC requirements of crush and impact.

^e This requirement applies only to products under ASME A112.4.4.

^f Once walls have been measured and verified to be within specification twice within a week of startup, wall thickness measurements shall be conducted no less than once per month.

^g Plug gauges are permitted, provided that the mold has been qualified by complete dimensioning and performance of appropriate testing on all products from all mold cavities to verify compliance with the referenced standard.

^h Requirements do not apply to ASTM F679 fabricated fittings and bell ends.

ⁱ Socket depth and thread length are only required to be verified at the time a new tool is “qualified” or when new or repaired cores are made.

^j Ring gauges are permitted, provided that the mold has been qualified by complete dimensioning and performance of appropriate testing on all products from all cavities to verify.

^k Flattening applies only to products produced under ASTM D2949 as referenced in Section 2 of this standard.

^l This requirement applies only to products produced under CSA B181.2 and CSA B137.3.

^m This requirement does not apply to products produced under CSA B182.2

No point anywhere along the length of the spigot shall the OD be allowed to fall below the minimum for equivalent size pipe.
